...

Flash Synchronisation. Early flash photography was not synchronized. It's hard to imagine an non-synchronized flash today, but the way those worked was that one had to put a camera on a tripod, open the shutter, trigger the flash, and close the shutter again - a technique known as open flash.

A Brief History of Photographic Flash

Flash output - How bright do you need your flash to be when shooting? Keep an eye out for a flash's guide number which tells you how far a flash can reach. Typical budget flashes will have a guide number of around 35 to 45, meaning they can reach 35 to 45 feet at ISO 100, while more expensive and powerful flashes can easily have guide numbers that surpass 100.
