I need to get the file type of a file with the help of node.js to set the content type. I know I can easily check the file extension but I've also got files without extension which should have the content type image/png, text/html aso. This is my code (I know it doesn't make much sense but that's the base I need):

That was a big disappointment. But now the field can be included in Canvas apps, flows and model driven apps as well. Below is the screenshot of file data type in canvas app. And it works like a charm. I wonder whether it will be ever exposed to the Model driven apps and if yes, I think it completely changes the dynamics of file storage in CDS.
