key dimensions of human development. The three key dimensions are: 1 - A long and healthy life - measured by life expectancy. - Access to education - measured by expected years of schooling of children at school-entry age and mean years of schooling of the adult population. - And a decent standard of living - measured by ...

Human Development Index (HDI) - Our World in Data

In process improvement efforts, the process capability index or process capability ratio is a statistical measure of process capability: the ability of a process to produce output within specification limits. The concept of process capability only holds meaning for processes that are in a state of statistical control. Process capability indices measure how much "natural variation" a process ...
