Programming in Forth is more of an “art” than programming in any other language. Like painters drawing brushstrokes, Forth programmers have complete control over where they are going and how they will get there. Charles Moore has written, “A good programmer can do a fantastic job with Forth; a bad programmer can do a disastrous job.”

A Classic Forth Code Example

Forth is an imperative stack-based computer programming language and environment originally designed by Chuck Moore. Language features include structured programming, reflection (the ability to examine and modify program structure during execution), concatenative programming (functions are composed with juxtaposition) and extensibility (the programmer can create new commands).
