Mammography Technologist at RadNet

Because they can aid in the early detection and diagnosis of breast diseases, mammograms are an important part of medical care. In fact, since 1990, mammography has helped reduce the number of breast-cancer deaths by almost one-third. Many mammography patients come in for routine screenings; others might have lumps or other signs of breast cancer.

Mammography - ARRT

There's also mammography exams that use radiography. One in eight women will be diagnosed with breast cancer at some point in their lives. This necessitates the need for rad techs to work in the field of mammography. New 3D tomosynthesis equipment makes the diagnosis process much better but it still uses Xrays.
