The Problem of Information - True.Origin

Information overload is the difficulty in understanding an issue and effectively making decisions when one has too much information about that issue. Generally, the term is associated with the excessive quantity of daily information. Information overload most likely originated from information theory, which are studies in the storage, preservation, communication, compression, and extraction of information. The term, information overload, was first used in Bertram Gross' 1964 book, The Managing o
