Laboratory Exercise #2 - The Celestial Sphere . Purpose: Learn to use a geocentric model of the celestial sphere for purposes of celestial navigation and sky observing. Given any location, date and time on the Earth, find the constellations and stars in the heavens. Given the constellations and stars in the sky at a specific time and date, find the geographic location.

### Laboratory Exercise #2 - The Celestial Sphere

Skylab was the first United States space station, launched by NASA, occupied for about 24 weeks between May 1973 and February 1974. It was operated by three separate three-astronaut crews: Skylab 2, Skylab 3 and Skylab 4.Major operations included an orbital workshop, a solar observatory, Earth observation, and hundreds of experiments.. Unable to be re-boosted by the Space Shuttle, which was ...

### Skylab - Wikipedia

Your time in the lab is best used observing the "sky", not reading this manual. Bring to class this lab manual, your lab book, a pencil or erasable pen, a straight edge, and a scientific calculator. A pre-lab is due at the beginning of the second lab session (i.e., the second week of this lab).

### Astronomy 113 Laboratory Manual - UW-Madison Astronomy

Welcome to Your Sky, the interactive planetarium of the Web.You can produce maps in the forms described below for any time and date, viewpoint, and observing location. If you enter the orbital elements of an asteroid or comet, Your Sky will compute its current position and plot it on the map. Each map is accompanied by an ephemeris for the Sun, Moon, planets, and any tracked asteroid or comet.

If you have your own copy installed, you can work on lab exercises at your own convenience, review or double-check your lab answers before quizzes, or just play around with it. The program can be downloaded at: Stellarium. This program is installed in the computer lab LSC 174, so you are free to use it any time the lab is open.

### Lab 01: Stellarium | PHYS 1401: Descriptive Astronomy

The sky is bright blue. When the sun sets, the sky turns a gorgeous salmon pink. After the sun has set, the sky pales to pink, then lavender; as it gets dark, the sky becomes a deeper purple, then midnight blue, and, finally, it looks black. The color changes you perceive in the sky are due to the \_\_\_\_ of light that it reflects.

### Chapter 3 Post Test Flashcards | Quizlet

Last week I met my friend. He waas with a young girl. The Girl was a student of our University. This is a wire. The wire is long. She is an engineer.
